

MB

We start early

That way you get the best of everything, the best water, the best wake action, the best ride.

At MB Sports, we start early and work hard, because of it we are ahead of the rest. Our lineup of custom boats continues to improve. This year we have taken another step forward with the all new B52 23. 23 feet of pure adrenaline that will dominate our industry with incredible performance and mind blowing looks.

Family Owned

The Brendel family has been building custom boats since 1950. Everyday our goal is to build the best boat possible. Our staff is on the water everyday pushing the limits and demanding more out of every boat we produce to ensure that MB leads the industry in quality, value and pride of ownership.

With over 60 years of boat building history, a culmination of well-researched technology, meticulous craftsmanship and an abiding sense of passion. MB challenges you to find a better built boat in the industry. If you too are passionate about your boat and watersports, then MB Sports has the boat to fit your demanding needs. Please be assured that our factory and dealers will deliver the best product and service available. MB Sports is committed to providing you with a superior ownership experience.

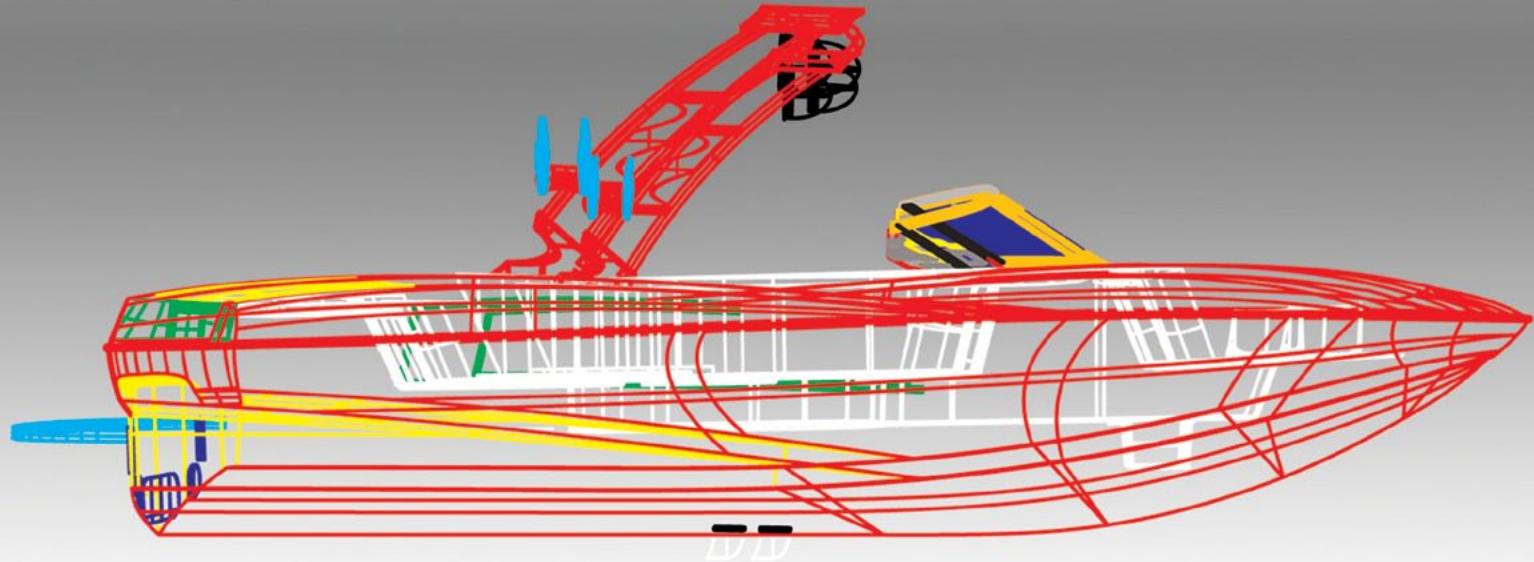

By God's grace, maintain a dynamic, growing business with a Christian impact by developing, marketing and manufacturing quality products, which perform as they should and enrich the lives of those who use them throughout the world.

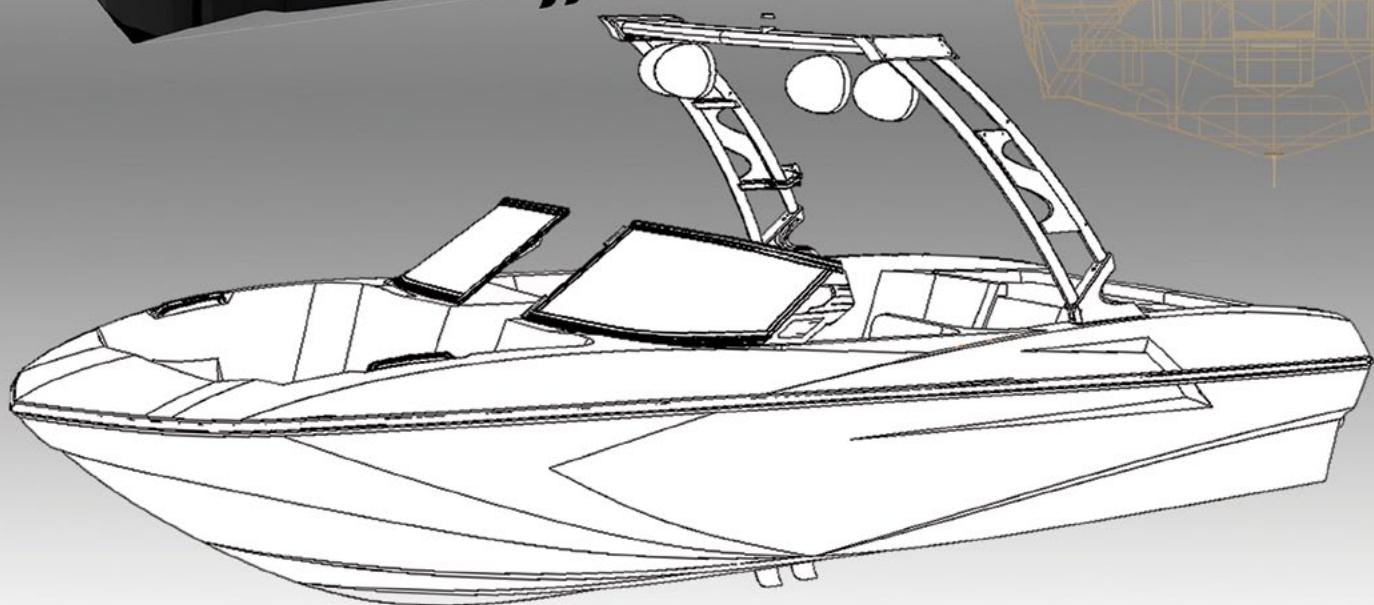

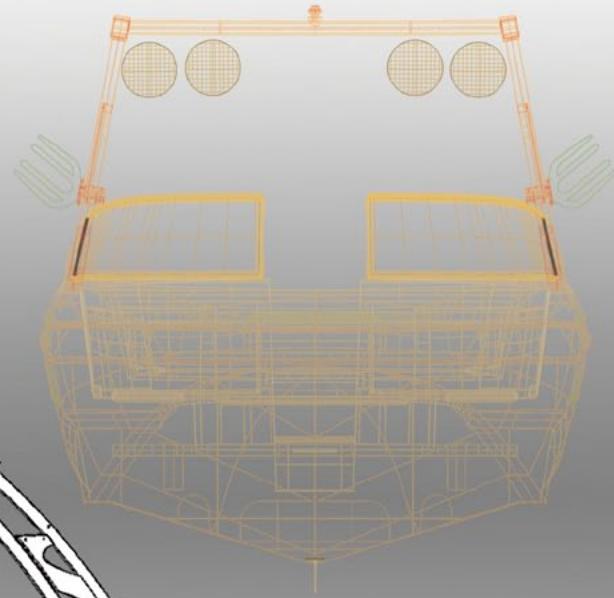

A handwritten signature in black ink that reads "Mike Brendel". The signature is fluid and cursive, with a distinct script style.

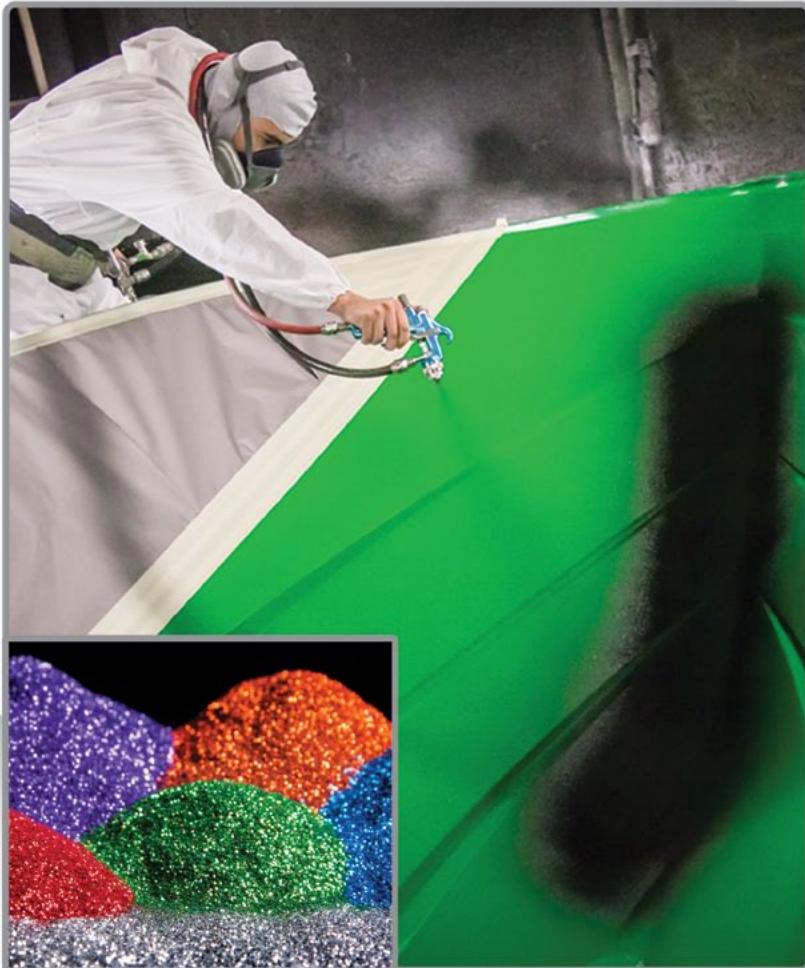

Design

MB is proud of its hand-tooled heritage, and as much as we'd like to stay old school we've welcomed CAD and CNC with open arms into our mold making process. MB validates its performance with years of experience and expertise while working alongside legendary marine engineers accomplished in CAD design. CAD gives us the opportunity to communicate our vision with engineers and see it virtually before we begin production. This aspect of our design is critical for our customers and us as a manufacturer. We are able to comb over each area of our new model, take into account the associated costs to stay competitively priced. We utilize the input we've gained from our dealer network and customer base, allowing us the ability to stay competitively priced and pass on our savings to customers.

CNC machines then carve out of a foam block a flawless plug that will ensure our mold integrity through the construction process. We forecast our construction with the highest quality components for marine application to ensure longevity and dependability while out on the water.

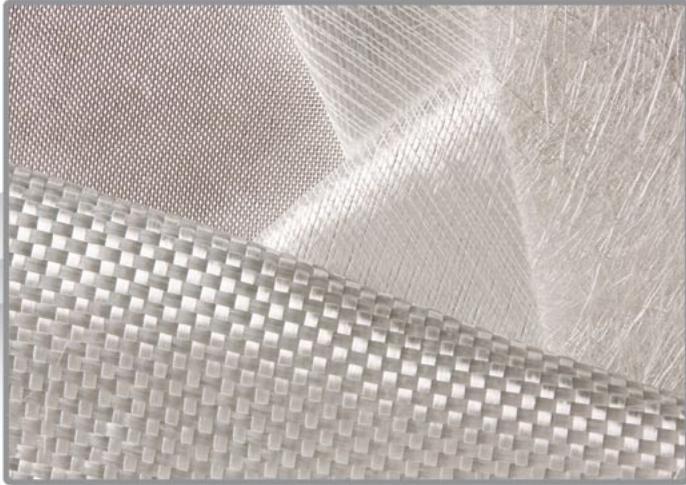

GEL COAT

A hands-on manager oversees MB's construction throughout each process. He instills the work ethic, expertise, and artistry that characterize our boats. Our gelcoat and construction process is the standard for quality throughout the marine industry. Classic hand taped graphics are sprayed with the finest colorants and Polycryl's custom engineered metallics. This combination creates lasting impressions that are vibrant and unparalleled to others on the water.

CONSTRUCTION

We start with 100% hand-laid fiberglass construction of the hull, deck and stringer.

Engineered to take rough water abuse and absorb impacts that would crack and puncture other composites. MB uses vinyl ester resin with superior fiberglass reinforcements for years of worry free enjoyment.

UPHOLSTERY

Part of MB's world-class construction is its upholstery department. Our premium vinyl is hand sewn with Gortex thread and upholstered with stainless steel staples. MB heat forms virgin plastic and utilizes various densities of foam for superior fit and finish. Our hatches are CNC'd from SpaceAge Synthetics to be extremely light and extraordinarily strong. MB is proud that our customers can enjoy the lap of luxury without breaking the bank.

COMPONENTS

All 2015 MB models come equipped with a PV350 GPS cruise control. New standard equipment for 2015 are the Exile Audio Speakers, Sub and Amplifiers creating a full, clean sound.

All models are trimmed with billet aluminum logos and accents treated with a bright dip finish. Our stainless steel tower is constructed with MB exclusive triangle tubing generating exceptional strength and rigidity easily lowers for storage with gas shock assistance.

MB SWITCH

In 2015 MB introduces the Switch Surf System. This new addition allows you to weight the boat evenly and control what side you surf with the simple push of a button. Transfers have never been easier, a horn sounds, alerting the rider to setup for a transfer and seconds later the wave shapes up giving the rider the ability to switch sides, opening up a wide range of wakesurfing options to help push your riding to the next level.

LESS FUEL CONSUMPTION

Our computer controlled sequential firing multiport EFI system coupled with the additional control of wide-band air/fuel sensors and dual spark plugs makes for a leaner running engine which equates to better fuel economy and lower emissions. More time on the water and less time at the pump.

QUIET RIDE

The overhead cam engine design coupled with a cast iron engine block and exhaust manifolds makes for an engine that runs smoother and quieter. Experience a smooth purr instead of a loud engine that prevents you from being able to hear one another when on the boat.

SERVICEABILITY

The standard closed cooling system makes winterization a snap with self-draining manifolds and fewer components requiring water drain. With our easily accessible remote mounted oil fill, routine maintenance is painless. Our hi-mounted alternator, flame arrestor and fuse & relay box are not only easily accessible at the top of the engine but are under the engine's beauty cover for extra protection.

MARINE ENGINES

WELCOME TO A
HASSE-LFREE
OWNERSHIP
EXPERIENCE!

CLOSED COOLING

Helps maintain consistent engine temps contributing to better fuel economy and performance. Also prevents crank case condensation, ultimately eliminating corrosion leading to a longer engine life. Provides improved cabin heater performance

DUAL SPARK PLUGS

Provides for more efficient combustion leading to increased fuel economy, reliability and cleaner emissions

CORROSION PROTECTION

Our 5-step state-of-the-art paint process, e-coated components and special coatings on non-paintable components keep the outside of the engine looking new. Components that do come in contact with corrosive environments are made of brass, copper, stainless steel or cast iron to ensure longevity.

B52
23

Completely redesigned for 2015, the B52 23 has once again pushed the limits of design and performance. Staying true to its roots, the B52 23 creates professional calibre wakes and surf waves. A perfect blend of style and performance, the B52 23 continues to set the bar in wake sports.

Specifications: Length: 23' / 7.01m • Beam: 100" / 2.54m • Draft: 22" / 0.56m
Boat Weight: 4,100 lbs. / 1,860kg • Ballast Capacity: 3,000 lbs. / 1,043kg
Seating: 16 Persons • Fuel Capacity: 65 Gallons / 246 L
Base Engine: Indmar 6.2L Raptor 400

B52
21

The B52 21 is one of the most well-rounded and versatile vessels in the MB Sports line. Whether it's a skiing and wakeboarding on the early morning glass, pulling kids on the tube or an afternoon surf session, the B52 21 will handle it all with ease and comfort.

Specifications: Length: 21' / 6.40m • Beam: 100" / 2.54m • Draft: 22" / 0.56m
Boat Weight: 3,900 lbs. / 1,769kg • Ballast Capacity: 1,800 lbs. / 816kg
Seating: 14 Persons • Fuel Capacity: 65 Gallons / 246 L
Base Engine: Indmar 6.2L Raptor 400

F24 TOMCAT

The F24 Tomcat features 2,400 lbs. of quick fill ballast that guarantees professional size wakes with firm pop, long transitions and a stretched pocket for surfing. The F24 has enough room for you and your family to enjoy both day trips and week long adventures.

Specifications: Length: 24' / 7.32m • Beam: 102" / 2.59m • Draft: 22" / 0.56m

Boat Weight: 4,400 lbs. / 1,928kg • Ballast Capacity: 2,400 lbs. / 1,089kg

Seating: 16 Persons • Fuel Capacity: 65 Gallons / 246 L

Base Engine: Indmar 6.2L Raptor 400
